SUMMARY

Six months of experience as MERN stack developer with solving complex problem and debugging skills. Hand on experience trending technology like react, nodejs and much more. I am also tech learner to find better solution for development and I like to explore new technology. I am also able to learn various ui library like Material ui, Tailwind css and Antd. Now I want to join the best team to use my knowledge to make better projects to solve real world problems.

EXPERIENCE

MERN DEVELOPER :

MAY -2022 to OCT -2022

Freelancer 3D Assets Ecommerce

In this project I worked on an ecommerce template developed by our client to integrate rest api with react client. Also make the changes on template using library like bootstrap. We developed new components using react and bootstrap and integrating 3d models in app using react fiber. Developed contact rest api to manage leads.

MERN DEVELOPER:

MAY -2022 to OCT -2022

Freelancer Ecommerce

In this I am responsible for developing rest api using node js, mongo db and express and also test this api with Postman. Make secure endpoints with various libraries like bcrypt, jsonwebtoken and jwt. Also build middleware to handle errors that occur on the server side. Build responsive components in react with bootstrap.

WORDPRESS CMS :

Real Estate Site

I developed a real estate site using wordpress cms with astra theme.

SKILLS

FRONTEND : HTML, CSS, JS, REACT, BOOTSTRAP.

BACKEND: NODEJS.

DATABASE: POSTGRES_SQL, MONGODB.

CMS: SANITY, WORDPRESS.
